Toronto, Ontario | +1(647)891-7611 | nit.madabusi@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

University of Toronto

Toronto, ON

Honours Bachelor of Science, Computer Science

Expected Graduation: 2025

- Relevant Coursework: Data Structures and Algorithms, Software Tools & Systems Programming, Algorithm Design, Analysis & Complexity, Computer Organization, Artificial Intelligence, Introduction to Image Understanding
- Extracurriculars: External Coordinator at **Google** Developer Student Clubs: UTM (2022)

EXPERIENCE

Software Engineer Intern

May 2023 – August 2024

PocketHealth

Toronto, ON

- Developed a secure HL7 interface engine in **C#** over **TCP/IP** for data exchange among **1.7M+** patients across **150+** providers.
- Developed a real-time notification framework by integrating **Prometheus** with **Log Analytics Workspace**, which reduced system downtime by **25%**.
- Automated the opt-out workflow for appointment reminders using **Customer.IO**, handling over **2,500** messages and enhancing communication reliability by **40%**.
- Enhanced the appointment reminders dashboard in **Angular** through advanced filtering, sorting, and pagination, cutting operational delays by **30%**.
- Designed and deployed a resilient, event-driven microservices system using **Azure**, **C#**, **Go**, **MySQL**, and **Docker**, enabling scalable integration of patient observations with machine learning models.
- Architected a compliance-focused logging solution using **Azure** and **C#**, improving observability and supporting secure communication and auditing practices across services.

Tech2U Student Classroom Ambassador

Sep 2022 – April 2023

University of Toronto Learning Space Management

Toronto, ON

- Resolved technical issues (e.g., projectors, recording systems) in lecture halls and tutorial rooms, ensuring uninterrupted lectures and minimizing disruptions.
- Facilitated communication between team members and technical co-pilots to achieve smoother work shift execution and faster issue resolution.

PROJECTS

Healthy Mom and Child+ | *React Native, Javascript, MongoDB, Expo*

- Developed a mobile app focused on women's reproductive care and personalized tracking.
- Designed interactive, real-time UI features using **React Native**.
- Processed weekly pregnancy data using **JavaScript** and **MongoDB (NoSQL)**

StockAI | *C++, OpenAI API, Docker, GitHub Actions*

- Built a CLI app in **C++** to fetch real-time stock data and generate insights using OpenAI's **GPT** model.
- Dockerized the app and integrated **CI/CD** with **GitHub Actions** for automated builds and testing.

Card Mania | *Java, SOLID Design Patterns, OOP Principles*

- Developed a suite of card games in **Java** with robust game logic using SOLID design principles.
- Wrote unit tests and conducted code reviews to ensure smooth gameplay and performance.

SKILLS

Programming Languages: C#, TypeScript, JavaScript, Python, Java, Go, C, SQL, HTML, CSS3, C++

Frameworks & Libraries: Angular, React, React Native, Node.js, Spring Boot, .NET, Numpy, Pandas

Tools & Technologies: Git/GitHub/GitLab, Docker, Azure (Service Bus, Container logs), Prometheus, OpenAPI, OpenAI API, MySQL, PostgreSQL, MongoDB, NoSQL, MSSQL, Bash, Kubernetes (Familiar)

Concepts & Additional Skills: REST APIs, Microservices, Event-driven Architecture, Software Development, Agile Development, Unit & Integration Testing, System Design, Debugging & Troubleshooting, CI/CD, Application Security
